

F1 Series Desktop All-in-one Live Streaming Machines

Key Features

- **Live 3.0:** This is an advanced live streaming system designed for desktop live streaming and sales. It is compatible with all popular live streaming platforms and provides a seamless experience for users.
- **Three-color LED fill light:** The ring-shaped design of this fill light ensures that you have ample light for live streaming. With adjustable color temperature and brightness settings, you can create the perfect lighting for any environment.
- **Intelligent chroma keying with green screen:** Replacing your background with an image or video of your choice, making your live streams more engaging and professional. With the ability to extract characters naturally and realistically, creating stunning visual effects to capture your audience's attention.
- **800W Sony sensor lens:** This lens is equipped with a high-quality Sony chip that delivers clear, crisp images. This makes it perfect for live streaming where image quality is critical. With a more delicate background of chroma keying, your live streams will be visually stunning.
- **Rich Expansion:** With a range of expansion options available, the F1 Series allows you to tailor your live streaming setup according to your specific needs. Whether it's integrating additional cameras, audio equipment, or specialized streaming accessories, the S1 Series accommodates your requirements with ease.
- **MediaTek Tianji 1200:** This high-performance chip is manufactured using TSMC's 6nm process and comes with the Android 11.0 operating system. It provides a smooth and responsive user experience, making it ideal for live streaming and sales.

Product Description

The Live Streaming Machine F1 Series combines the portability and versatility of a mobile streaming device with the power and features of a traditional live room, where portability meets power.

With Live 3.0, this cutting-edge device seamlessly integrates with all mainstream platforms for advanced streaming. The F1 Series features a three-color LED fill light and intelligent chroma keying, providing optimal lighting and seamless background replacement. Its 800W Sony sensor lens ensures clear, crisp images, with live camera switching and close-up product shots. Compact yet powerful, it outshines traditional live rooms while surpassing mobile streaming devices. Designed for professional live streaming, the F1 Series offers advanced features, making it the perfect solution for on-the-go streaming without compromising performance.

Elevate your live streams with the Live Streaming Machine F1 Series, delivering unmatched portability and power in a single device.

Product Specifications

Basic Parameter

Screen Size	15.6 inch
Physical (mm)	615*155*297.2
Packaging (mm)	730*390*300
Net Weight (kg)	3.5
Gross Weight (kg)	6.5

Hardware parameter

Resolution	1920*1080 FHD, 2K Resloutuion
Brightness	240-280 cd/m ²
Touch Type	G+G full coverage capacitive touch
Touch Points	10
Tempered Glass	Mosh 7 degree, 4mm thickness
Speaker	5W*2
Visual Angle	178° /178°

Motherboard

CPU	MediaTek / 6nm process / 8-core CPU
RAM	8G (16G for optional)
ROM	128G (256G for optional)
Android System	Android 11.0
Communication	WiFi 2.4+5G band/Standard WiFi6, 10-1000 megabit LAN adaptive, Bluetooth 5.0

Camera

Pixel	800W Pixels (5000W Pixels for optional)
Viewing Angle	Diagonal view 75 degrees
Sensor Type	Sony Sensors
Focusing	Fixed Focus

Fill Lights

Size	10 inch Fill Lights
Fill Light Color	Three colors,: Yellow light, White light, Mixed light
Light Gears	5 Gear
Powering method	USB-5V

Power Supply

Power Input	AC100-240ww
Standby Power	≤ 5W
Overall Power Consumption	≤ 100W

Optional Content

170° Pan-tilt Camera
(210W Pixel, 12x optical zoom, 16x digital zoom)

HD straight camera
(200W Pixel, 10x optical zoom)

Macro SLR Camera
(10x manual adjustment, special lens for product close-up)

Live spherical Fill light
(300 watts, adjustable three-color light, Remote Control)

Green Screen
(2*2.5m, smart keying green screen, Special for Live Show)

Professional Sound Card
(Live special sound card, wireless Microphone volume control, one-button interactive sound effect)
